PROFILE

Software Engineering student and Full-Stack Developer with hands-on experience building responsive, interactive web applications and polished digital products. Strong foundation in HTML5, CSS3, JavaScript, React, Vite, Firebase, responsive UI, DOM manipulation, local storage, GitHub and modern frontend practices. Also developing server-side applications with Node.js/Express through project work. Focused on clean interfaces, practical functionality, performance and professional user experience.

FEATURED PROJECTS

Nexora Digital — Professional Digital Agency Website

[HTML5](#) • [CSS3](#) • [JavaScript](#) • [Node.js](#) • [Express](#) • [Responsive UI](#)

Premium agency platform combining web development, SEO, digital marketing, social media, analytics and AI automation. Includes service exploration, direct email contact, mobile-responsive design, professional visuals and a 10-second showreel.

Ultra Commerce — Professional E-Commerce Website

[React.js](#) • [Vite](#) • [Firebase](#) • [Responsive CSS](#)

Modern e-commerce application with product browsing, search, filtering, wishlist, shopping cart, quick view, orders, authentication and a mobile-responsive interface.

Expense Tracker Pro v2.0

[JavaScript](#) • [Local Storage](#) • [Data Visualization](#)

Interactive expense-management application focused on transaction tracking, income/expense summaries and practical dashboard-style reporting.

Weather Dashboard

[JavaScript](#) • [API Integration](#) • [Responsive UI](#)

Weather-focused dashboard designed to present live-style weather information in a clean, responsive interface.

Ultimate Tic Tac Toe

[HTML](#) • [CSS](#) • [JavaScript](#)

Interactive game project emphasizing UI state, game logic, responsive layout and user interaction.

Personal Portfolio Website

[HTML](#) • [CSS](#) • [JavaScript](#) • [GitHub Pages](#)

Personal developer portfolio presenting projects, skills and web-development work in a responsive interface.
